

HICAP Sustainable Hotel Awards 2022

The annual HICAP Sustainable Hotel Awards are designed to recognize hotels in the Asia Pacific region creating innovative new methods, strategies, and technologies to face today's sustainable development challenge, while providing tangible examples of sustainable best practices that can be replicated and adapted across the region.

Worthy hotels can be entered in one or more of the categories, however, **a separate and complete entry should be submitted for each category consideration being sought**. A maximum of four hotels, regardless of the category, will be honored each year from the submissions received (i.e. there can potentially be multiple winners in one category).

By segmenting sustainable hotel practices into four categories, we recognize the key areas where hotel investment, development, and operations can have the biggest impact locally and globally. The categories enable hotels of all sizes, asset classes, and operating structures to showcase their leadership in embedding sustainability into their decision-making processes.

Nominated properties will be reviewed, and the award recipients selected, by an expert judging panel comprised of the following:

- **Chiara Calufetti-Lim**, Associate Vice President, WATG
- **Lyndall DeMarco**, Managing Director, Only Sustainability Pty Ltd (Honorary Chairman)
- **Hervé Houdré**, Founder, H2 Sustainability Consulting
- **Prashant Kapoor**, Chief Industry Specialist, IFC – World Bank Group
- **Eric Ricaurte**, Founder & CEO, Greenview (Chairman)
- **Masaru Takayama**, Founder and Chair, Asian Ecotourism Network
- **Claire Whitely**, Head of Environment, Sustainable Hospitality Alliance

We are sincerely grateful for the support and efforts of such an honorable and knowledgeable group of experts in ensuring the credibility and importance of these Awards.

Award Categories/Criteria

Entries should be completed in accordance with the criteria, which are provided to support you in identifying those factors that will help the Judging Panel in making their decisions. The criteria are designed to provide ideas for inclusion but are neither definitive nor exhaustive. Applicants should note **achievement of innovation in sustainable best practices is stressed in the review process**. Please include relevant information you believe addresses the objectives of sustainable development and operations within the context of the identified categories.

All categories and all entrants should fulfill the following base criteria:

- Identify which of the 17 UN Sustainable Development Goals are supported
- Demonstrate the aspects of the property and/or initiative that are innovative and exemplary beyond the common best practices (i.e. beyond just obtaining a green certification, installing LED lighting, or holding a volunteer community day)
- Explain why a hotel investment audience should be interested in the property and/or initiative

Category 1 – Building Preservation/Adaptive Reuse

Sustainable development can embrace the lessons of historic buildings with positive environmental, social, and economic implications. In other words, often the best development solution is not destroying and replacing a historic building with a new exemplary green building, but to reuse the existing building capital by applying various strategies and depth of “rehabilitation and adaptation” of existing structures.

Accordingly, awards in this category focus on embedding innovative methods to preserve natural and cultural resources in the renovation, retrofit, repurposing, or adaptive reuse of existing facilities and structures. **Note: Emphasis will be placed on quantification/ measurement of impacts/practices where applicable.**

The judges will be considering, among other things, aspects such as:

- Identification and preservation of historic and heritage significance
- Retention of the setting and visual esthetics of the existing structures and facilities
- Use of local, environmentally sustainable, and culturally significant materials or furnishings
- Best-in-class management of deconstruction processes, recycling and reuse of demolition debris and construction waste, and repurposing of building elements
- Innovation in investment and financing mechanisms to fund the renovation (i.e. Green Bonds, crowd funding, grants, government or supplier partnerships, incentives and rebates, etc.)

Category 2 - Climate Action

Awards in this category focus on reducing Greenhouse Gas emissions to support global climate action in line with the Paris Agreement and UN Sustainable Development Goal 13, including the increase of renewable energy and protection or restoration of ecosystems that absorb CO₂, which may be within the property’s design and operations, the habitats and ecosystems outside the property, or the larger value chain. **Note: Emphasis will be placed on quantification/ measurement of impacts/practices where applicable.**

The judges will be considering climate action methods taken, which may include, among other things, one or more of the following:

- Innovative use of highly efficient technology, design, or programs to reduce energy consumption
- Advanced generation or procurement of renewable energy
- Conservation or restoration of key carbon sinks such as forests and oceans
- Sustainable Consumption and Production (SCP) models or supply chain initiatives to reduce significant carbon footprints from purchased goods within FF&E, OS&E, and/or F&B
- Proactive and large-scale guest engagement or community involvement to catalyze awareness on climate action
- Innovation in investment and financing mechanisms to fund the projects (i.e. Green Bonds, crowd funding, grants, government or supplier partnerships, incentives and rebates) that lower the cost of capital, or create fixed-cost asset models from traditional variable cost items such as energy and waste

Category 3 – Positive Community Impact

Awards in this category focus on optimizing a hotel's resources and reach to generate tangible positive impact for local communities; moving beyond philanthropy toward strategic use of resources, expertise, and funds to create better community engagement models with win-win benefits and **quantifiable impact metrics**.

The judges will be considering, among other things, aspects such as:

- Innovative use of inventory or routine areas of spend to maximize community benefit
- Methods of building programs and models with local suppliers and partners to stimulate entrepreneurship, local business ownership, and autonomy
- Reviving and protecting authentic cultural heritage traditions that benefit the wider destination and strengthen its sense of place
- Generating positive multipliers for other sustainable development goals such as enabling communities to address climate change and sustainable consumption & production
- Innovative and effective water stewardship to address water stress, water access, and water quality concerns
- Data-driven analysis of results demonstrating positive social impact metrics, beyond just volunteer hours, cash donation amounts, or number of community members served
- Innovation in investment and financing mechanisms to fund the projects and create value for the hotel or the project

Category 4 - Sustainable Design

Awards in this category focus on the design brief agreed and ways in which developers, owners and operators have worked with architects, designers, engineers, etc. in realizing **most innovative and holistic methods, strategies and technologies** in both building materials and operational efficiency, minimizing impacts to the site and its surrounding natural environment and local communities, and creating value to the location's natural and cultural heritage. **Note: Property must be completed/operating at time of entry.**

The judges will be considering, among other things, aspects such as:

- Specific innovative design elements promoting the latest technology in sustainability to reduce impacts and increase efficiency (renewable energy, net-zero building, water recycling, waste/water treatment, use of vegetation, advanced building materials, electrification and energy procurement/storage/distribution, building and operational automation, etc.)
- Integration and protection of the natural environment and layout within the wider landscape to preserve ecosystems and minimize disruption of biodiversity
- Overall appreciation of the design within the community and landscape to create an appropriate sense of place (reflecting cultural norms, heritage, traditions, authenticity, and design etc.)
- Specific innovative elements in the building's construction and development, such as using materials with renewable or circular economy aspects, passive design, biomimicry, permaculture, water harvesting, etc.
- Integration of aesthetics, guest experience, and innovative design with sustainability
- Innovation in investment and financing mechanisms to fund the projects (i.e. Green Bonds, crowd funding, grants, government or supplier partnerships, incentives and rebates) that lower the cost of capital, or create fixed-cost asset models from traditional variable cost items such as energy and waste

Entry Guidelines

1. Eligibility

To be eligible for award consideration, entrants must be able to effectively demonstrate the following:

- The property is located within the Asia-Pacific Region
- If applying for the Sustainable Design Award, the project should have been completed and operating by time of entry submission
- Identify which of the 17 UN Sustainable Development Goals are supported
- Demonstrate the aspects of the property and/or initiative that are innovative and exemplary beyond the common best practices (i.e. beyond just obtaining a green certification, installing LED lighting, or holding a volunteer community day)
- Explain why a hotel investment audience should be interested in the property and/or initiative

2. Format

Application forms, specific to each award type, can be downloaded from the HICAP website

<https://www.burba.com/HICAP/Program/HICAP-Sustainable-Hotel-Awards>

- For completion and submission or completed online.
- Supplemental material can be submitted to accompany an entry but must relate specifically and directly to the criteria in the application form. Boilerplate content and unrelated initiatives (i.e. program for training at-risk youths in the kitchen for a hotel applying for Climate Action) will not be reviewed and risks diluting the application's relevant strengths
- File Format: Microsoft Word, PowerPoint, or PDF (keeping in mind File Size restrictions of 10MB and 20 pages maximum)
- Font: No smaller than 12 point
- Language: English

3. Submitting Entries

Entries should be submitted by email to: SustainableHotelAwards@HICAPconference.com

4. Closing Date

Entries must be submitted by midnight (SGT) on **15 August 2022**.

5. Promotional and Supporting Material

As this is a sustainability award, hard copy or promotional material is not required and should not be submitted.

6. Awarded Entry Presentations

Presentations of the awarded hotels will be prepared based on the entry information provided and may be published on the HICAP conference website and on other sites and publications publicizing the Award.

7. Assessment and Adjudication

HICAP will convene an assessment and award selection panel of external sustainability experts/practitioners. These judges discuss and score entries to determine the award recipients. The decision of the Judging Panel is made in good faith and is final. If necessary, the Judging Panel may reach out to reference names, other industry contacts, or draw upon collective first-hand knowledge for due diligence of the information being submitted. When deciding, the Judges will consider:

- Measurable achievement relative to the award base and category criteria
- Demonstration of innovation
- Evidence of partnership

- Replicability (providing solutions for sustainability)
- Relevance to the hotel investment audience

8. Notification of Results

There will be a maximum of four HICAP Sustainable Hotels Award winners. Entrants will be notified by **16 September 2022**.

9. Awards, Announcement and Presentation

The HICAP Sustainable Hotels Awards will be announced and presented during the HICAP closing luncheon at **approximately 2pm on 21 October 2022** at the Fairmont Singapore & Swissotel The Stamford. Award recipients or their appointed representatives, if not already registered HICAP delegates, will be provided with a special pass for participating in the award presentation.

10. Feedback

Given the volume of entries, we are unable to provide feedback to entrants.

11. Questions, Feedback or Suggestions

Any questions or comments regarding the entry requirements and procedures or suggestions about the HICAP Sustainable Hotels Award can be made by email to:

SustainableHotelAwards@HICAPconference.com
